

Amphenol EC Systems is THE leading provider of Energy Technology and Electric Vehicle Cable Assemblies as well as Customized Cable Solutions.

Expertise

We leverage 30 years of unparalleled experience, depth of product offering, and process expertise.

Quality

With premium components and proven processes, Amphenol delivers market-leading quality.

Commitment

We are committed to being the leader of ruggedized cable solutions for the harshest environments.

Our Focus:

EV Connectors & cable assemblies. Regardless of the connectors you specify to your application, we can customize and manufacture a cable that ideally meets any Electric Vehicle Charging Station OEM/MRO requirement.

Special Processes:

- High quality, low to high volume certified cable assembly and value-add facility.
- High Potential (HIPOT), continuity, and insulation testing on 100% of assemblies.
- ISO certified QA/QC processes.
- Custom Labeling

EV Charging Connectors
(CHAdeMO | CCS Combo | J1772)

Cable Assemblies

Engineering (Value-Add)

The most reliable, durable, cost-effective connectors & cable solutions on the market. Period.
